

Dijkstra Demo

- Nodes
 - Blue: currently in Q (fringe nodes)
 - Red: currently in R (tree nodes)
 - White: undiscovered
- Edges
 - Black: unexplored
 - Red: in shortest path tree
 - Blue: best connections from tree to fringe
 - Gray: useless
- Blue numbers: d -values that may be over-estimates
- Red numbers: d -values that are shortest distances
- Snapshot taken just after initialization and at the end of each loop iteration
